Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-7, 12-14, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanders (WO 02/32233 A2).

Sanders discloses the use of aivosin for the treatment of microbial infections in swine and poultry (page 1) but does not disclose the treatment of specific infections encompassed by the present claims. However, since aivosin is a well known antibiotic known to be useful in the treatment of microbial infections in pigs and poultry, it would have been prima-facie obvious to a person having ordinary skill in the art at the time the claimed invention was made to also use aivosin for the treatment of specific microbial infections encompassed by the present claims.

Applicant's arguments filed May 16, 2008 have been fully considered but they are not persuasive.

Applicant contends that Sanders does not disclose specific microbial infections encompassed by the present claims. Applicant further contends that the fact that an antibiotic such as Pulmotil is less effective in treating specific bacterial infections encompassed by the present claims, demonstrates the unpredictability of the efficacy of antibiotic agents. These arguments have not been found persuasive. Note that while Pulmotil antibiotic is less effective against the claimed microbial infections, it still has some effect. Thus, it would have been prima facie obvious to a person having ordinary

skill in the art at the time the claimed invention was made would to try aivlosin in the treatment of the claimed microbial infections, because such a person would have expected such treatment to result in at least some efficacy.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
